[0015] The amount of component (C) based on 100 parts by weight of the total of components (A), (C) and (D) is preferably 5 to 55 parts by weight, more preferably 7 to 40 parts by weight, particularly preferably 10 to 35 parts by weight. Less than 5 parts by weight of component (C) may fail to give sufficient sensitivity, forming a cured film lacking strength and ability of elongation, and more than 55 parts by weight of component (C) may also fail to give sufficient sensitivity. The component (C) preferably contains 5 parts by weight or more of the compound represented by general formula (I). Less than 5 parts by weight of the compound represented by general formula (I) cannot give a cured film having sufficient strength and elongation.
